FACULTY OF COMPUTING - ACADEMIC PROGRESSION & GPA HANDBOOK

Clause 1.1: Credit System and Honours Classification
Students must complete 120 credits for the BSc (Hons) in Data Science. Module DS205.3 (Data Science with Python) carries 15 credits and is weighted at 60% Examination and 40% Coursework.

Clause 1.2: Minimum Passing Criteria
To pass any module, a student must achieve at least 40% in the continuous coursework component AND at least 40% in the final examination, with an overall aggregated mark of 40% or above.

Clause 2.1: GPA and Degree Classification Thresholds
First Class Honours: Final Cumulative GPA of 3.70 to 4.00 with zero academic misconduct offenses.
Second Class Upper Division: Final Cumulative GPA of 3.30 to 3.69.
Second Class Lower Division: Final Cumulative GPA of 3.00 to 3.29.
General Pass: Final Cumulative GPA of 2.00 to 2.99.

Clause 2.2: Distinction Requirements in Coursework
A Distinction grade requires a score between 65% and 84%, while a High Distinction requires 85% to 100%. In DS205.3, submissions without an objective empirical evaluation framework cannot achieve a Distinction grade regardless of code quality.
